## SAND THERAPY

Experience the ultimate exfoliation and toxin elimination as you plunge into a sand bath. Heated by the sun, the sand warms the body and initiates sweating to eliminate toxins and impurities from the skin and activates the microcirculation of the blood. The many minerals present benefit the cetaceous skin layers, which emerge more healthy and radiant. Besides exfoliation and detoxification, sand baths can minimise the symptoms of rheumatism. Being buried in the sand may not be for everyone; it's a good idea to talk to your doctor in advance if you are not sure it is for you.

THB

650++

per person  
for 30-minute session
